Signature \_\_\_\_\_ Date \_\_\_\_\_

## TREE POWER

Here at your local utility we want to do our part for a better environment. We hope you will join us.

We're launching a tree planting effort as part of a nationwide public power program called **TREE POWER**. The cities goal is to plant 11 thousand trees - one for every public power

Customer.

Trees enhance the quality of life for everyone - and help save energy too -

We are proud for this community to be a participant in this program. Here are just a few of the benefits trees provide:

- Improving air quality
- Reducing energy costs by providing shade in summer and wind breaks in winter
- Increasing beauty and value of your home and our community.

Contact us for more information on how you can take part in **TREE POWER**.

## ACCEPTABLE TREE SPECIES

### DECIDUOUS TREES (MIN HEIGHT, 8')

Red Maple	London Planetree
Sugar Maple	Sycamore
River Birch	Sawtooth Oak
Hackberry	N. Red Oak
American Beech	Shingle Oak
White Ash Seedless	Pin Oak
Green Ash	Willow Oak
Maidenhair Tree	Red Oak
Thornless Honeylocust	Japanese Pagoda
